TestPro Expert Tools : Learn NVP

Learn NVP utility in TestPro Expert Tools Menu measures the NVP (Nominal Velocity of Propagation) of a known length of Cable.

1. Use Cable of known length between 10m to 100m.
2. Connect Cable between Main & Remote Unit Channel/PL Adapters
3. Expert Tools -> Learn NVP -> Enter Cable Length in meters -> Ok

Note : Cables with longer length (80m to 100m) give more accurate NVP values.
